

Adult and Family Counseling Program

Offers ADHD Screenings for Youth

Is your child struggling with attention, focus, or behavior?

We offer comprehensive ADHD screenings to help identify attention-related challenges and guide next steps for support.

SCREENING INCLUDES:

BASC-3: Evaluates social, emotional, and behavioral functioning

TOVA: Computerized visual attention test

CAPS: Clinical Attention Profile Scale

Clinical Interview: Conducted with child, family, and school input

WHAT TO EXPECT:

- Screening by a licensed counselor
- Input from school staff (with consent)
- Detailed report with recommendations
- Parent meeting to review results
- Option to share with school or doctor
- May identify other emotional or mental health needs

REFERRALS ACCEPTED FROM:

- School staff (teachers, social workers, psychologists)
- Parents or guardians
